Price **3,35 zł** gross

B-267

Full product description

The gasket B-267 is used in handles, pipe clamps with a sheet width of **20mm**, sheet thickness of **2mm**.

There is a possibility of cutting into sections at a price of 1 to 10 groszy per piece. Detailed pricing on request.

The gasket is made of a flexible, durable **EPDM** (ethylene-propylene-diene rubber) rubber compound, and is characterized by:

- high resistance to aging and weather conditions, ozone and UV radiation
- resistance to organic and inorganic acids, cleaning agents, potassium and sodium alkalis
- maintaining its properties in the temperature range **from -50°C to +130°C**
- flexibility and susceptibility to stretching
- good memory of the original shape.

hardness: 70 +/-5 °ShA

material: EPDM rubber

package contains: 100m/profile

On request, it is possible to produce the profile on a different rubber base (NBR, SBR, etc.).

With profiles of this category, we recommend pallet shipping. It will prevent distortion or deformation of the profile (they can occur with cardboard shipping).

The listed price is for 1mb of profile.
