Price **20,39 zł** gross

Full product description

The B-495 bumper strip has been designed to protect the body of your car against any abrasions and impacts on the walls of the garage or wall. Installation of the bumper is very simple - peel off the strip from the double-sided tape (glued on the smooth back wall of the profile) and place the strip in the place of your choice. The tape is reinforced with fibers, making it even more durable than ordinary double-sided tape.

The gasket is made of a flexible, durable **EPDM** (ethylene-propylene-diene rubber) rubber compound, and is characterized by:

- high resistance to aging and weather conditions, ozone and UV radiation
- resistance to organic and inorganic acids, cleaning agents, potassium and sodium alkalis
- maintaining its properties in the temperature range from -50°C to +130°C
- flexibility and susceptibility to stretching
- good memory of the original shape

material: EPDM rubber

hardness: 70+/- 5°ShA

color: black

width: 165mm

height: 15mm

minimum section length: 1pcs = 40cm

On request, it is possible to make a gasket on a different rubber base (EPDM, NBR, SBR, etc.).
